How great it is to be in the Hereford business these days. That is especially true when you get the opportunity to own a herd sire like HH Advance 0002X. We were able to purchase this great young sire in the recent Holden Herefords sale. He is as complete a bull as we could have hoped to find with a light birth weight of 68 pounds and good growth and carcass numbers. Phenotypically, he is long spined, well pigmented, and has great muscle expression, structure and eye appeal. He is in the top 4% of the breed for BW, Milk, M&G, and REA EPDs and ranked #1 in the sale in both BW and Milk EPD and tied for #1 in REA EPD. His dam is a great 5104 daughter and his grandam is one of Holden's most proven cows still going strong at 11 years of age. We are expecting great things from this promising young sire. Come on by and see for yourself. Owned with Holdens.

Semen for Sale. Contact Henry or Jack.
